

Login window

Webitel Phone login window is default for all operating systems except for Windows where the [ADFS](#) authorization is provided additionally. Find more details below.

Default login window:

Parameters	Description
Login	Full Webitel user name: ID @ Domain Webitel
Password	Webitel user password
Language	Language of the interface
Server	Webitel Engine app server access address
Login	Log in button
Version	Version of the app

User domain authorization

Use domain auth switch will turn on the domain authorization

Optional parameters for authorization in your ADFS are displayed.

ADFS

In order to use the domain authorization, your Webitel server must be configured accordingly and synchronization of users via the LDAP protocol must be enabled.
