

# Configuration file

Webitel Phone is available for 3 platforms: Windows, Linux and MacOS.  
The format of the user\_config.json configuration file is common to all platforms and will be discussed below.

- [Order priority](#)
- [Run-time key](#)
- [User profile directory](#)
  - [macOS](#)
  - [Linux](#)
  - [Windows](#)
- [Configuration file](#)

## Order priority

The priority of the search for the application configuration file:

1. Run the application with the -c or --config switch.
2. In the user profile directory
3. In the application directory.

## Run-time key

You can specify the path to the configuration file using the key:

```
webitel-phone -c tmp/user_config.json
```

or

```
webitel-phone --config=tmp/user_config.json
```

## User profile directory

The location depends on the operation system.

### macOS

At the **Finder**, press and hold the Option button and click the Go menu - open Library.

Full patch: ~/Library/Application Support/webitel-phone/user\_config.json

Your browser does not support the HTML5 video element

### Linux

Full patch: ~/.config/webitel-phone/user\_config.json

### Windows

Your browser does not support the HTML5 video element

Full patch: %appdata%\webitel-phone\user\_config.json

## Configuration file

## user\_config.json

```
