

Webitel 3.6 upgrade notes

The document describes the process of upgrading the Webitel server version 3.5 to version 3.6.3.

Backup

Before you proceed to the upgrade, we recommend that you back up the current configuration:

```
/opt/orchestration/bin/bootstrap.sh backup
```

Update process

Delete all docker containers and update permissions:

```
sudo -s
docker rm -f $(docker ps -aq)
docker volume rm $(docker volume ls -q)
chown -R 1000:1000 /opt/webitel/elasticsearch5
```

Update basic Linux packages:

```
sudo apt update
sudo apt -y upgrade
curl -L "https://github.com/docker/compose/releases/download/1.12.0/docker-compose-$(uname -s)-$(uname -m)" -o /usr/local/bin/docker-compose
```

In the **/opt/orchestration/env/environment file**, change the version of the webitel to 3.6.3

```
export WEBITEL_VERSION="3.6.3"
```

Refresh Webitel:

```
cd /opt/orchestration
git checkout master
git pull
git checkout v3.6.3
./bin/bootstrap.sh pull
```

Launch server

```
./bin/bootstrap.sh up -d
docker rmi $(docker images -q)
```

Webitel updated!
