

# Webitel 3.7 upgrade notes

The document describes the process of updating the Webitel server version 3.6 to version 3.7.

## Backup

Before you proceed to the upgrade, we recommend that you back up the current configuration:

```
/opt/orchestration/bin/bootstrap.sh backup
```

## Update process

Delete all docker containers and update permissions:

```
sudo -s
docker rm -f $(docker ps -aq)
```

Update basic Linux packages:

```
sudo apt update
sudo apt -y upgrade
curl -L "https://github.com/docker/compose/releases/download/1.15.0/docker-compose-$(uname -s)-$(uname -m)" -o
/usr/local/bin/docker-compose
```

In the **/opt/orchestration/env/environment** file change the version of the webitel to 3.7.1

```
export WEBITEL_VERSION="3.7.1"
```

Refresh Webitel:

```
cd /opt/orchestration
git checkout master
git pull
git checkout v3.7.1
./bin/bootstrap.sh pull
```

Launch server

```
./bin/bootstrap.sh up -d
docker rmi $(docker images -q)
```

Webitel updated!
