

Provider connection

To be able to receive or make outgoing calls, you must register any SIP gateway. For example, [Youmagic](#).

In [Webitel WebClient](#) we open section [07 Gateways](#) and we are going to add. Types of providers:

- **SIP Trunk** - provider without registration. IP authorization.
- **SIP Provider** - provider with authorization by login and password.

For **Youmagic** choose **SIP Provider**. We enter registration data into the card:

After, the gateway must register.
