Elasticsearch read-only?

, Elasticsearch " ". webitel .

Step-by-step guide

Elasticsearch, :

1. elasticsearch: **/opt/webitel/esdata6**. 10% .
2. :

```
docker exec -it elasticsearch2 curl -XPOST http://kibana:kibana@localhost:9200/cdr*/_open
docker exec -it elasticsearch2 curl -XPOST http://kibana:kibana@localhost:9200/.kibana*/_open
docker exec -it elasticsearch2 curl -XPOST http://kibana:kibana@localhost:9200/accounts*/_open
```

3. :

```
docker exec -it elasticsearch2 curl -XPUT -H 'Content-Type: application/json' -d '{ "index": { "blocks":
{ "read_only_allow_delete": "false" }}}' http://kibana:kibana@localhost:9200/_settings
```

4. , elasticsearch read-only, 95%. , :

```
docker exec -it elasticsearch2 curl -XPUT -H 'Content-Type: application/json' 'kibana:kibana@localhost:
9200/_cluster/settings' -d '
 {
   "transient": {
       "cluster.routing.allocation.disk.watermark.low": "9gb",
       "cluster.routing.allocation.disk.watermark.high": "5gb",
       "cluster.routing.allocation.disk.watermark.flood_stage": "3gb",
       "cluster.info.update.interval": "1m"
     }
}'
```

, domain.
