Webitel 3.11.x release notes

We are pleased to announce the new release of **Webitel 3.11**!

A lot of work has been done to fix errors and improve stability.

We should also mention the transition to elasticsearch and kibana version 6.5 enabled x-pack and an updated interface.
Through the development of an additional module on the side of elasticsearch, we have added support for the rights of access to graphs and dashboards in Kibana.
Now you can customize what the user group to which analytics has access.

We expect your wishes for the further development of the new functionality on Customer portal.

Thanks to the **whole team** that worked on this release.

v3.11.0 - January 22, 2019

Bug

- [WTEL-696] - bpmonline: CDR - can't access call recordings
- [WTEL-735] - The gateways don't remove after domain was removed
- [WTEL-736] - Kibana monitoring widget duplicates the agent several times.
- [WTEL-738] - Save as new method for the member of the dialer doesn't copy the variables.
- [WTEL-741] - ACR: member doesn't get expire from variable
