

# Configuring a SIP Provider

## Create an Account with a SIP Provider

First, you need to have an account with a VoIP service provider. Webitel supports most popular SIP based VoIP service providers. For an example, [Zadarm](#).

## Add the SIP Provider Account in Webitel

After you have created the SIP provider account, you will need to configure the account in Webitel. To do this:

1. **Name** - Any name, that you'll use for this account. For an example, SIP User name.
2. **Type** = SIP provider, if your authentication is based on Account/Registration.
3. **Profile** - leave empty or select External.
4. **Host/IP** - Enter the Hostname or IP of the VoIP Gateway
5. **User name** - SIP User ID of the VoIP Gateway
6. **Password** - SIP User password of the VoIP Gateway

Click “**Save**” to save the trunk settings.

Next, you must to create inbound and outbound routes.
